About Me

Computer Science: Game Design student at UC Santa Cruz with a strong focus on building engaging, player-centered experiences. Combines programming expertise with a deep understanding of game mechanics and user experience design to create immersive and polished gameplay. Passionate about collaboration, rapid prototyping, and refining ideas through iteration. Actively seeking opportunities to contribute to innovative projects and continue expanding a diverse game development portfolio.

Experience

Dining Services Associate

University of Santa Cruz Dining Services | September 2024 – Present

- Assisted high volumes of customers in a fast-paced dining environment while maintaining accuracy and efficiency
- Collaborated with team members to ensure smooth daily operations and timely service
- Maintained cleanliness and food safety standards in accordance with university and health guidelines
- Provided friendly and professional customer service to create a positive dining experience

File Clerk

PremierOne Credit Union | July 2022 – September 2022

- Organized and maintained filing systems to ensure efficient document management and accessibility
- Printed, labeled, and alphabetized files to streamline operations and improve workflow efficiency
- Identified and removed outdated or unnecessary loan files to enhance data accuracy and reduce clutter
- Maintained a detail-oriented approach to support a structured, organized, and professional work environment

Soccer Referee

PAL Soccer | July 2019 – September 2019

- Enforced game rules and regulations to ensure fair play and maintain discipline during matches
- Communicated clearly and effectively with players, coaches, and fellow officials to manage game flow and resolve disputes
- Managed on-field conflicts and de-escalated situations to maintain a safe and respectful environment
- Upheld the integrity of the sport while fostering a positive and professional experience for all participants

Game Jam Project – Luminara (4th Overall)

UNI Game Jam | July 2025

- Solo-designed and developed a puzzle-platformer in Unity using C# within a 7-day game jam
- Built core gameplay around guiding light through the night sky by placing stars to form constellations
- Achieved 4th Overall out of all submissions; ranked #3 in Fun & Engagement and #5 in Presentation and Theme categories
- Focused on rapid prototyping, game feel, and clear visual communication under strict time constraints

Skills

- Programming Languages: C#, C++, Python, Javascript
- Game Development: Unity, game mechanics design, rapid prototyping, gameplay systems
- UI/UX: Interface design, player experience optimization, usability principles
- Computer Science: Data structures & algorithms, systems programming, discrete math foundations
- Tools & Workflow: Version control (Git), debugging, iterative development

Education

- University of California, Santa Cruz — Santa Cruz, CA
B.S. Computer Science: Computer Game Design, Expected June 2027
- Foothill College — Los Altos Hills, CA
Video Game Design Summer Program
- Leigh High School — San Jose, CA
Golden State Seal Merit Diploma, June 2023
